## Robert system for automatic positioning welding

Patenttinumero: CN1118297  
Julkaisupäivä: 1996-03-13  
Keksijä(t): HONGYUAN YE (CN)  
Hakija(t):: YE HONGYUAN (CN)  
Pyydetty patentti: CN1118297  
Hakemusnumero: CN19940112498 19940906  
Prioriteettinumero(t): CN19940112498 19940906  
IPC-luokitus B25J3/04  
EC-luokitus  
Vastineet:

### Tiivistelmä

The welding robot system being able to position automatically uses camera measuring system to detect the positions of welded parts, whose relative position is then calculated. Under the drive of position servo control system, two parts to be welded are automatically positioned according to requirements, which increases the flexibility greatly.
